# Quality-focused Manufacturer

Premier Turf implements strict quality control throughout the production process, including resin melting, extrusion, twisting, tufting, coating, and packing, achieving 100% pass rate at every step.

# Strict Quality Control to Ensure the Best Product

Our experienced QC team runs through vigorous inspections before, during and after each manufacturing step to ensure the best-quality product for our customers.

- No oil, dirt, dust allowed
- Number of twists 100% up to Premier Turf standard

- Total 70m-long coating line with a 40m drying tunnel
- Maximum 5-meter roll width capacity
- Vigorous inspection for tuft withdrawal force

- Advanced double-feeding technology
- No tuft loops, burrs or fiber-splitting allowed

- 100% ex-factory pass rate before delivery
- Well-managed warehouse with 24h temperature control

# Recyclable Grass

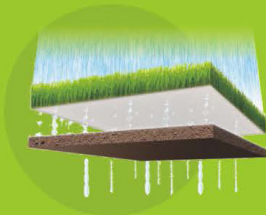

## Innovating for a Greener World

Premier Turf revolutionary RG recyclable grass is the 5th generation of artificial turf – a 100% recyclable & eco-friendly solution designed to solve end-of-life disposal issues and reduce carbon emissions.

### Fully recyclable, no latex or PU backing

100% polyolefin turf, with PE fibers and polyolefin-woven backing, is suitable for recycling without separating the yarns before disposal.

### Excellent Water Permeability

The super permeable backing achieves water drainage rate  $>50\text{L}/\text{m}^2/\text{h}$  to effectively avoid water pooling or logging.

### Extra-strong Turf Lock

Premier Turf advanced hotmelt technology allows each turf of fibers to be firmly locked into the backing, making it suitable for more intensive and longer-hour use.

## EnviroGrass – Landscaping

100% Recyclable Landscaping Turf

# Sport

- ✓ **Super Realistic**

Density:  
Characteristics:  
• Top Quality

**Best Seller**  
ElitePlay - Plus - 110

Material: PE  
Decitex: 11000  
Fiber Thickness: 205±20µm  
Pile Height: 50mm  
Density: 7560-31500/m<sup>2</sup>  
Characteristics:  
• super wear resistance  
• built 2+ fields each day

PowerPlay STEM-120

Material: PE  
Decitex: 12000  
Fiber Thickness: 320±20µm  
Pile Height: 50mm  
Density: 7560-31500/m<sup>2</sup>  
Characteristics:  
• great wear resistance & weatherability  
• excellent standing ability

TurboStrike C/3C

Material: PE  
Decitex: 16000  
Fiber Thickness: 357±20µm  
Pile Height: 50mm or 60mm  
Density: 7560-31500/m<sup>2</sup>  
Characteristics:  
• 3 green tones in one tuft suitable for frequent use  
• tear-resistant backing

## Padel Grass
